Detroit Region SCCA Street Tire Class Requirements:

PURPOSE: Encourage more participation in Detroit Region Solo II events.

1) Car must be licensed and registered for road use (current plate). NOTE: trailered "street tire" entries are discouraged.

2) Any DOT-approved tire may be used with a treadwear rating of 140 or higher unless the tire is the OEM-supplied tire on that vehicle (examples: Toyota MR2 and Acura NSX). EXCEPTION: Vehicles equipped with "R" type tires from the OEM will run in the regular stock class (example: Camaro SS equipped with the BFG R1 option).

3) Street Tire Class will be designated by prefixing a "T" to the respective Solo II classification, i.e. a car classed in E Street Prepared but running on street tires will have the designation TESP. This will avoid confusion with Street Touring (ST).

4) Street Tires Class entrants will run with their respective class, i.e. TASL will run when ASL runs.

5) Street Tire classes will be "bumped" per the published bump order in the 1998 Solo Events Rule Book, page 220 if there are not 3 entrants in a particular Street Tire class. Bumping will occur until there is a "class" of 3 entrants. The resulting combined class will not be indexed (in other words, positions in combined classes will be based on raw time with pylon penalties). (NOTE: Street Touring cars will be bumped to their respective Street Prepared class if there are insufficient entries in the Street Touring class.)

STOCK CATEGORY:

HS => ES => DS => CS => BS => AS => SS => to correct Street Prepared class
GS^ FS^ for bumped car.

STREET PREPARED CATEGORY:

ESP => BSP =>
ASP => To correct Prepared class for bumped car.

DSP => CSP =>

PREPARED CATEGORY:

CP => BP =>
AP => To DM or EM, whichever is correct for bumped car.

EP => DP =>

6) Street Tire Class will award year-end trophies for the Regional Series.

CLASSIFIED ADS
